GAME-CHANGING SELF STORAGE ACCESS CONTROL

Partner with
Europe's leading
full-service provider.

NOKĒ™ SMART ENTRY SYSTEM

Seamless integration. Enhanced efficiency.

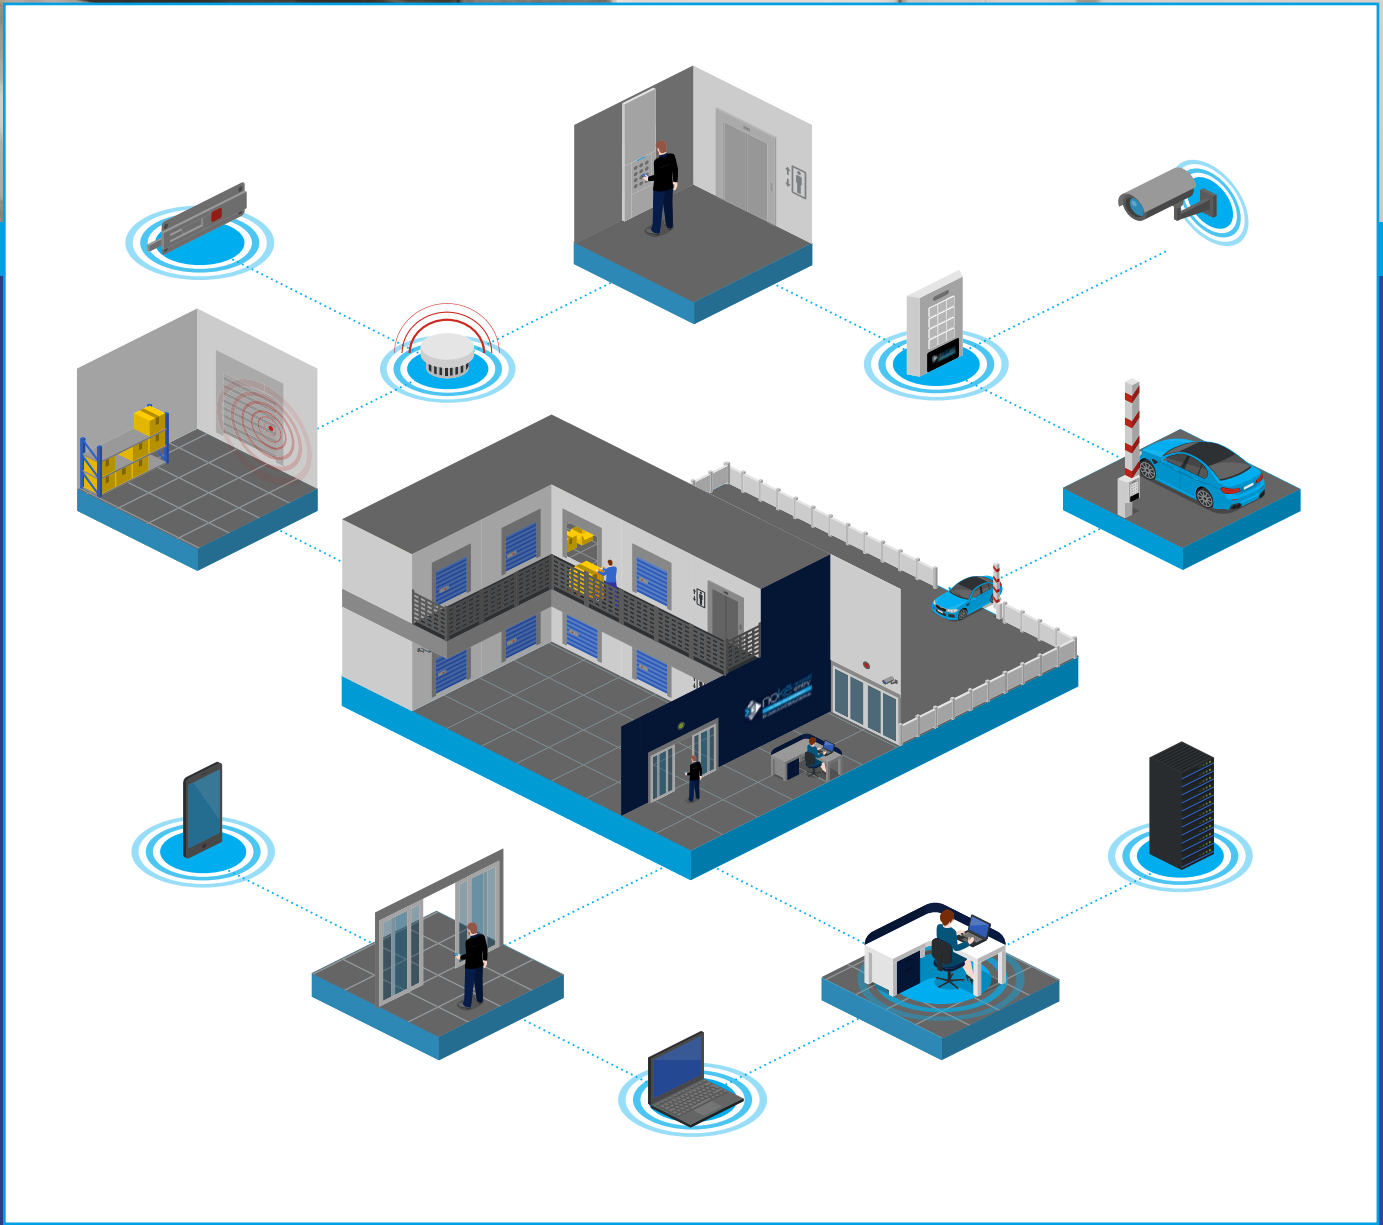

Nokē™ Smart Entry is the award-winning smart access solution for self storage. Nokē™ combines innovative hardware, cloud-based software, and a mobile app to provide simple, secure, and convenient access and facility management.

Specifically engineered for the self storage industry, Nokē™ Smart Entry offers effortless convenience for both tenants and operators whilst ensuring robust security. Tenants enjoy smooth facility access via their smart devices, while operators gain enhanced security, efficient management tools, and the reliability of a sector-leading solution.

As the game-changing smart access control system, it has quickly become the industry standard.

Manage facilities remotely with software that integrates seamlessly with all major Property Management Software providers. The feature-rich smartphone application, available in multiple languages for both iOS and Android, offers notification options for operators and tenants.

Advanced features ensure that facilities remain secure, while allowing easy access for tenants. The system uses encrypted cloud-based security, as well as motion detection to further improve security.

OPERATOR BENEFITS

OPERATIONAL EFFICIENCY

Automated access control, remote management, and digital integration – like online booking and automated workflows – streamline operations, boost productivity, enhance security, and optimise space while reducing day-to-day tasks and maintenance.

OPTIMISED CUSTOMER JOURNEY

A streamlined tenant journey improves convenience, security, and retention, driving referrals and higher occupancy. Digital access and online booking reduce admin tasks, freeing staff for higher-value work.

REVENUE GROWTH

Digital platforms enable upselling opportunities by promoting premium units and services, while also facilitating cross-selling of add-ons during the booking process.

COMPETITIVE ADVANTAGE

A tech-forward facility attracts tenants seeking convenience and innovation, while insights from access and usage patterns enable data-driven decisions for staffing, marketing, and operational strategies.

TENANT BENEFITS

CONVENIENCE

Tenants enjoy seamless, keyless access to storage units through an easy-to-use smartphone app, eliminating the need for physical keys.

PEACE OF MIND

Advanced security features, including motion sensors and activity logs, ensure belongings are safe, monitored, and protected 24/7.

CONTROL

Tenants remain informed and in charge with real-time activity logs and instant notifications for added transparency and security.

EFFICIENCY

Streamlined processes for move-ins, payments, and account management save time, making storage operations smooth and hassle-free.

AUTONOMY

Secure, independent access empowers tenants to manage their units without needing on-site staff, enhancing convenience and satisfaction.

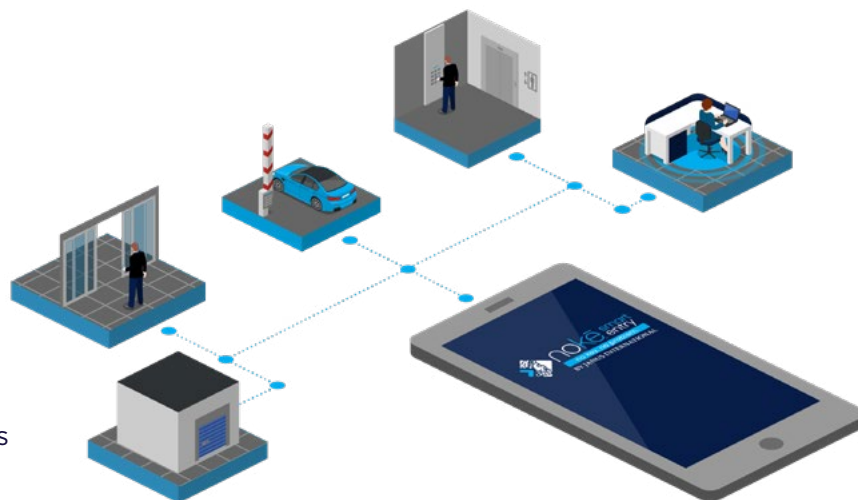

FEATURES

- Cloud-Based Software
- Property Management Software Integration
- Remote Management
- Custom Notifications
- Process Automation
- Online Booking & Account Management
- Real-Time Activity Logs
- Automatic Overlocking System
- Mobile App (Tenant Access & Operations Management)
- Digital Key Sharing
- One-Touch Entry
- Automated Rentals
- 24/7 Access
- Activity Tracking
- 2 Year Warranty

NOKĒ™ PRODUCTS

Nokē™ Smart Entry delivers innovative smart access solutions designed to modernise self storage facilities.

By combining advanced technology with cloud-based software, Nokē™ enables efficient and convenient access management tailored to the unique needs of operators and tenants.

nokē ion

no key. no problem.

BY JANUS INTERNATIONAL

Nokē Ion™ is a low-voltage, hard-wired smart lock designed to provide continuous, energy-efficient access control, offering unmatched reliability and compatibility.

- Constant, low-voltage power
- Enhanced locking mechanism
- Customisable (LED light & motion sensor)
- Low maintenance
- Sleek in-the-door-frame design

CONTROLLERS

The Nokē™ Smart Entry system allows operators to make their facilities smart by connecting a wide range of access points to their system through Nokē Entry Controllers, such as the Nokē Keyless Entry Control or Nokē Pad. This enables smart control and gives operators the ability to open access points remotely. Access points include:

- Gates
- Sliding Doors
- Overhead Doors
- Pedestrian Doors
- Goods & Passenger Lifts
- Office / Reception Doors

Nokē™ One is a versatile, battery-powered smart lock designed for secure and efficient access control, offering excellent integration and reliable performance.

- Enhanced battery life
- Quick installation
- Thermal motion sensor
- On-door lock placement

NOKĒ™ RETROFIT

Operators can modernise their existing self storage facilities with Nokē™ Smart Entry, unlocking the full potential of smart access technology.

Designed for flawless integration, Nokē is fully compatible with all existing Janus infrastructure, making retrofitting simple and efficient. Enhance security, streamline operations, and offer tenants the convenience of smart access - all without the need for major renovations.

SIMPLE

The Nokē™ Smart Entry system offers an ideal experience for both tenants and operators, enhancing convenience through easy access and system management via smart devices. Its automation capabilities allow for remote management and streamlined onboarding, simplifying operations and minimising the need for physical presence.

SMART

Embracing the latest in technology, the Nokē™ Smart Entry system is at the forefront of the self storage industry's shift towards smart access solutions. Operators and tenants benefit from cutting edge features that maximise the efficiency and utility of smart entry systems.

SECURE

With state-of-the-art security measures including motion sensors, high-quality build, digital encryption, and software notifications, the Nokē™ Smart Entry system ensures comprehensive protection and peace of mind. These features work together to prevent unauthorised access and safeguard valuables.

PROPERTY MANAGEMENT SOFTWARE INTEGRATIONS

Seamless integration with over 40 providers including:

TECHNICAL SPECIFICATIONS

ACCESS POINTS

Main gates, sliding doors, lifts and more using Nokē™ Entry Controllers.

JANUS INTERNATIONAL DOOR OPTIONS:

- 650R Roller Door
- Flat Swing Door
- Hi-Security Corrugated Swing Door

OFFLINE CAPABILITIES

Should there be a breakdown in internet connectivity, tenants can still access the facility and units using their smart devices. Once reconnected, information stored on the Nokē™ device will be synced with the cloud.

SITE REQUIREMENTS

Power	230V AC power
Wi-Fi or Mobile Data	Broadband or cellular data is required within entry points
Network	CAT6 cable will be required to access points and various locations throughout the storage facility to enable cloud connectivity. A spare network port for installation of a network switch (Power over Ethernet) within the technical room
Internet	Internet should be available and have speeds of at least 10 Mbps upload and 10 Mbps download time

WHAT'S INCLUDED

- Nokē Electronic Locks, Motion Sensor and Digital Overlock to any smart units
- Nokē Entry Controller or Nokēpad to access points where specified
- Nokē Smart Entry Gateway Hubs
- Nokē Smart Entry Smart Phone App & Web Portal Application
- PoE Switches
- Software Support via phone / email or chat (valid for 12 months from system launch)
- Initial Training for the facility management team

ADDITIONAL OPTIONS:

- Integrate with 3rd party remote monitoring providers
- Sounders installed in corridors
- Key fobs

INSTALLATION

All Nokē™ Smart Entry hardware and network switches are supplied and installed by Nokē-trained professionals. A dedicated Nokē expert will provide comprehensive training.

WARRANTY

2-year limited warranty for product and installation.

TECHNICAL SUPPORT

We offer a 24/7 technical support service via phone, email, and live chat.
